DESCRIPTORS	*College Attendance; *Community Colleges; Comparative Analysis; *Enrollment Rate; *Enrollment Trends; Ethnic Groups; Full Time Equivalency; *School Demography; Student Characteristics; Tables (Data); *Two Year College Students; Two Year Colleges
IDENTIFIERS	*California Community Colleges

ABSTRACT

The third in a series of multiple-year reports on California community college enrollment, this report enables readers to compare enrollment at individual colleges during the 1990s. It's designed especially for persons at the state and local levels who use data on community college students for planning and analytical purposes. This document provides tables and graphs of student data from the Chancellor's Office Management Information System. The first section provides a summary of data on statewide enrollment and full-time equivalent students for 1990-1991 to 1997-1998, and trends in headcount enrollment, and credit and noncredit enrollment for 1970-1997. Section 2 includes a summary of statewide fall enrollment (1994-1997) by load (i.e. full-time, part-time, non-credit), age, gender, ethnicity, educational status, and academic level. The third section contains fall and spring enrollment (1994-1997) for each of the 114 colleges. Finally, the fourth section provides fall enrollment by college and by the student characteristics of load, ethnicity, gender, age, status, and educational level. (AS)

Preface

This is the third in a series of multiple-year reports on the community college enrollment. This multiple-year format is to enable readers to compare enrollment of individual colleges over time. The data for this report is extracted from information colleges and/or districts provided to the Chancellor's Office Management Information System (MIS).

A report of this magnitude relies upon the work of community college district personnel who submit unit record data on more than 1.4 million students each term. Our appreciation is extended not only to those individuals, but also to staff in the Chancellor's Office MIS Division who provided the basic work files from which this report was prepared.

Chuen-Rong Chan, Specialist in the Chancellor's Office Research and Analysis Unit, analyzed and edited data, organized the structure and format of this report, and developed the various computer programs used to produce the report's tables and graphs.

This report is designed for those individuals at the state and local levels who use data on community college students for planning and analytical purposes. We welcome your comments and suggestions on ways in which the data may be more usefully displayed. Please direct any comments, questions, and suggestions to the Research and Analysis Unit at (916) 322-4656, Fax at (916) 327-5889, or E-mail at cyong@cc1.cccco.edu or cchan@cc1.cccco.edu.
